# MARK JASON B. RAMOS

**IT and Systems Specialist | Infrastructure ● Network Security ● POS & Payment Systems**

San Pedro City, Laguna, Philippines | 0976 302 3893 | mrk.ramos118@gmail.com

## PROFESSIONAL SUMMARY

IT and Systems Specialist managing hardware, network, security, and POS/payment systems across multiple business locations. Built a foundation in IT support through a 600-hour internship at Philippine Savings Bank (PSBank), then moved into a full infrastructure role at MLG Hospitality. Magna Cum Laude graduate of the BS Information Technology program (2026), with strengths in troubleshooting, system security, technical documentation, and AI-assisted development.

## EXPERIENCE

**IT and Systems Specialist** | *MLG Hospitality* **June 2026 - Present**

- Manage and maintain the company's hardware, software, network, and payment systems across all locations; keep systems current with updates and patches and monitor network performance and security.
- Diagnose and resolve hardware, software, and network problems promptly to minimize disruption to operations.
- Monitor safeguards against unauthorized access, cyber threats, and data breaches; ensure backups are followed and tested for recoverability; help develop and enforce IT policies.
- Install, configure, and maintain POS systems across locations; monitor payment performance and security, resolve faults quickly, and ensure compliance with company and industry standards.
- Work with other departments to identify technology needs and automation opportunities; support system upgrades and new software implementations.
- Maintain records of IT issues, resolutions, and upgrades; report on system performance, security, and usage; write standard operating procedures and train staff.

**IT Technical Support Intern** | *Philippine Savings Bank (PSBank)* **Sep 2025 - Feb 2026 (600 hours)**

- Set up, configured, and troubleshot user computers, including secure data wiping and system reformatting.
- Assisted with network setup and troubleshooting and provided remote desktop support for computer and network concerns.
- Helped organize server and network racks, including cable management and equipment installation.

## PROJECTS

*Developed with AI Models including ChatGPT, Claude, Claude Code, and Codex.*

**GateWatch: Student ID Verification and Violation Monitoring System** *Philippine Christian University · 2023 - 2026*

- Developed a web-based system that verifies student IDs using high-frequency RFID, with violation monitoring to track students who do not comply with university policies.

**Legson Media Website** *Remote project for a California, USA-based client · 2026*

- Designed, built, and maintained the site with a focus on UI/UX quality, mobile responsiveness, and Core Web Vitals performance.
- Applied technical, on-page, and structural SEO to improve indexing and search visibility; handled ongoing updates, page-speed improvements, and search metadata.

**HTML Studio Pro** *Remote project for a California, USA-based client · 2026*

- Web-based workspace for organizing, tracking, and recording SEO content (blog posts, area/location pages) across client websites; logs what is written, published, and updated to avoid duplicate topics and coverage gaps, and supports local SEO per service-location page.

**Elite Builders IX Website** *Built with the Legson Media team · 2026*

- Website for a family-owned, licensed framing contractor in Modesto, California, with city-specific local SEO pages across the Bay Area, Central Valley, and Southern California, plus projects, reviews, a blog, an FAQ, and free-estimate lead forms.
